

THE GrenadierTM

ELECTRIC FIRELIGHTER

FIRELIGHTING GUARANTEED!

Here is the clean, simple, efficient way to light a solid fuel fire – and its exceptionally fast and economical too! Without matches, paper, sticks or smelly chemical firelighters.

You don't need to clear the grate; just riddle through the fine ash and leave the cinders, then put on the fuel and switch on the Grenadier.

On the hearth

With the range

With the barbecue

In the garden

The **award winning** Grenadier is guaranteed to light all solid fuels including wood, coal and smokeless fuel – and can take as little as a couple of minutes to do it. The secret is in its powerful, concentrated heat. You just position the Grenadier and switch on. A built-in fan effectively directs the heat so that the fuel quickly reaches burning point. Once it's alight you switch off the heat and just let the fan blow until the fire is really well away, just like bellows.

As a safety precaution the heating element on the Grenadier can only be switched on by a special removable safety key. The sturdy yet lightweight Grenadier has a wide and rigid stand for stability and is easily adjustable to the correct height and angle for your fire.

A major advantage when lighting barbecues is that the Grenadier produces clean heat without any odour, unlike liquid

or chemical lighters, no chemical flavour is transferred to the food and the barbecue is ready to cook much quicker.

When gardening, the Grenadier eliminates the trouble associated with lighting your garden incinerator, simply load up the refuse and switch on the Grenadier – no smoke in your eyes or chasing paper around the lawn, and it's amazing how much more you can burn!

In line with our continuing policy of research and development in the interests of everyone we reserve the right to amend model specifications and services without notice.

**CLEAN!
FAST!
EFFICIENT!**

SPECIFICATION	
Case dimensions excluding handle Height: 15.5cm, Width: 14.0cm, Depth: 10.5cm	
Tube length including nozzle: 30cm	
Nozzle diameter: 2.9cm	
Maximum tube height above ground (to underneath of tube): 31cm	
Overall stand base dimensions: 21cm x 21cm	
Cable length: 2.0m	
Weight: 2.5kg	
Loading:	Element 1100W Motor 15W
Voltage:	240 AC Cat. No. 001
Voltage:	220 AC Cat. No. 002
MADE IN U.K.	
CE	
BEAB Approved Safety Assured
